

The Business Value of Google Cloud Marketplace for Acquiring Third-Party Software

IDC’s research demonstrates how **buying third-party software on the Google Cloud Marketplace** enables organizations to **optimize software costs** and **more efficiently and effectively handle software procurement, deployment, and governance**.

KEY RESULTS

CUSTOMER QUOTE:

“Google Cloud Marketplace does a great job of breaking down the minutiae of what the charges will be for software. We also have a presence with other public clouds — Google far and away makes it easier to see what things will cost.”

THIRD-PARTY SOFTWARE COST SAVINGS

CUSTOMER QUOTE:

“We are cutting 50% off the time to deploy new software, and we move faster from a development perspective with Google Cloud Marketplace.”
