K–12 Computer Science Education

Illinois

2017

Compared to the average U.S. principal, Illinois principals are slightly less likely to offer CS courses and extracurriculars. They are also less likely to note growth in CS, including participation and anticipated opportunities. A lower percentage of Illinois principals indicate support for CS or report that CS is a priority.

Values below indicate percentage point difference from the U.S. average. See back for full data tables.

Perceptions

School Infrastructure

State Policy as of 2017¹

- Dedicated state funding for CS PD
- Requires all high schools to offer CS
- K-12 CS curriculum standards

Background

Broadening equitable student access to computer science (CS) education is critical to our future, not only because of the increasing demand for qualified workers to fill computing-related jobs but also because it develops critical thinking to solve complex problems, creativity to foster new ideas, and skills to drive innovation. To inform the public on progress made toward ensuring broad participation in K–12 CS education, this report provides results from 2014–15 and 2015–16 Google-Gallup surveys. Topics include perceptions, opportunities, support, and infrastructure. It also offers recommendations to broaden access to CS learning for Illinois.

Findings

Results from the 2014–15 and 2015–16 Google-Gallup surveys show that while perceptions of CS are increasingly positive, there is still inconsistent implementation of CS education for students in U.S. schools.

- **Positive perceptions of CS prevail** among students, parents, and educators, including 88% of Illinois principals who believe that CS can be used in many different jobs (U.S. average 88%).
- The value of CS is high, where 57% of Illinois principals agreed that most students should be required to take CS (U.S. average 60%).
- **CS offerings are limited**, with 50% of Illinois principals reporting offering CS classes (U.S. average 57%).
- **Growth in CS opportunities is anticipated** by 48% of Illinois principals by 2019 (U.S. average 53%).

To help prepare schools for CS education, the study also identifies challenges to providing CS education for all students in Illinois.

- **Parents' demand for CS is not being heard**; 91% of U.S. parents want their child to learn CS, whereas only 9% of Illinois principals believe there is strong parent demand for CS (U.S. average 8%).
- **Principals perceive weak school board support for CS** in Illinois, with 39% indicating school board commitment (U.S. average 41%).
- Lack of teachers trained in CS (51%), focus on test preparation for other subject areas (48%), and insufficient budget for a CS teacher (47%) are the greatest barriers to offering CS for Illinois principals.

Recommendations

- **Promote broad, diverse participation** by taking advantage of interest and growth while integrating equity practices into CS recruitment and pedagogy.
- **Expand CS offerings** by connecting with communities, legislators, and organizations advocating for CS education.
- **Increase qualified CS teachers** through incentives and support of quality teacher preparation and certification.
- **Integrate CS** education offerings via flexible curricula, empowering teachers to incorporate CS into their subjects.
- Prioritize funding to meet the demand for CS education.

Google

This report summarizes the status of computer science (CS) education using data from 18,938 surveys collected in 2014–2015 and 2015–2016 from U.S. K–12 school principals.

These data are from a multi-year Google-Gallup study of U.S. K–12 students, parents, teachers, principals, and superintendents.

Illinois

Data Tables

The descriptive data tables below show responses by 768 Illinois K–12 principals compared to the full sample of 18,938 surveys collected in 2014–2015 and 2015–2016 from U.S. K–12 school principals; sample size may vary by question. Percentage point differences from the U.S. for each category were calculated from the percentages bolded below. Full methodology is at **goo.gl/7qwXgP**.
